

We're Making it with **you**

We're Making it with you

Makeit Co., Ltd. will lead the industrial tool market by creative research and innovative technology development based on its excellent technology and experience.

Makeit Co., Ltd. will become a **Customer-Centered** and **People-Centered Company** that deeply considers your productivity, convenience and safety.

CEO Seo Gi-hong

- Graduated from the Department of Shipbuilding, Geosje Susan High School
- 25 years of field experience in painting, pretreatment, outfitting, and processing
- Craftsman Computer Aided Ship Drawing
- Possess painting, pretreatment, welding, and finishing skills
- Possess metal processing skill
- Possess patents, utility models and designs

CEO Jang Jae-seok

- BA, Department of Business Administration, Silla University
- MS (Transportation), Graduate School of Engineering, Youngsan University
- CEO, JJ Construction Co., Ltd.
- CEO, Nuri Information System Co., Ltd.
- CEO, SS Construction Co., Ltd.

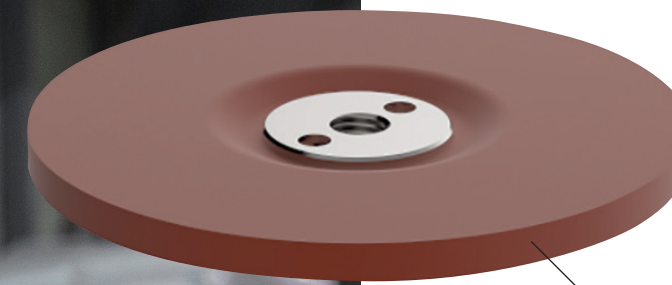

Research Director Park Eun-joo

- BS (Mechanical Engineering), College of Engineering, Hanyang University
- Ph. D Candidate (Convergence Mechanical Engineering), Graduate School of Engineering, Hanyang University
- In charge of R&D (Mechanical structure design) at small and medium-sized enterprise

Product Introduction

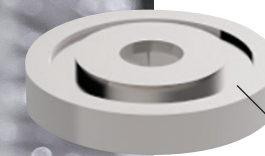

By hand without tools, regardless of air / electric grinder

***Replace the grinding wheel in 5 seconds!
Fast and easy new concept grinder***

EZ Grind

Easy-to-detach bush applied grinding wheels

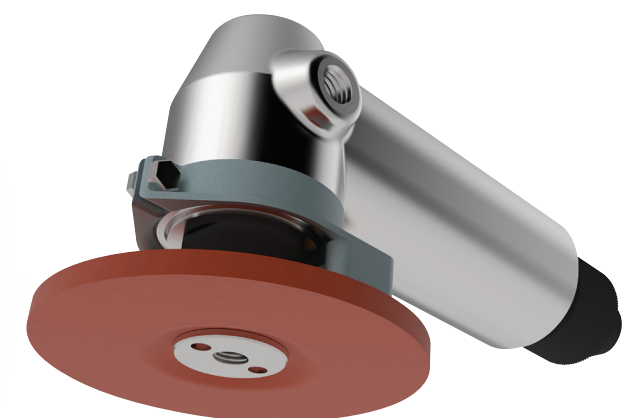

EZ Washer

Accessories making grinding wheel more easily replaceable by little force.

EZ SpinLock

Just applying EZ SpinLock to the grinder on site, You can use our EZ Grind.

Just attach it on the grinder you're using, and you can use it the way you used it!

Much easier way of replacing grinding wheels!

Development Background

Difficulties of the conventional way of replacing wheels

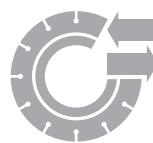

It takes more than 5 minutes to replace the grinding wheel.

Tools such as spanner and L-wrench are required for replacement.

Replacement tools and grinding wheels fixing screws carried separately are often lost.

Grinding wheels replacement occurs too early or too late due to the hassle of replacing the grinding wheels during work.

Replace early and **discard** less-used grinding wheels.
Risking the breakage of grinding wheels due to late replacement

Advantages of using Makeit products

Increasing productivity by reducing replacement time.

Simplifying equipments by only carrying extra wheels for replacement.

Eliminating the trouble of work delay and repurchase due to loss of parts and tools.

Saving costs and protecting the environment by reducing waste of tools and grinding wheels. Reducing accidents due to the breakage of grinding wheels.

The more you use it, the more firmly the wheels are combined, which increases safety and efficiency.

Applicable to both air grinders and electric grinder.

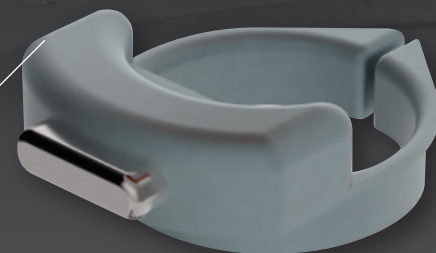

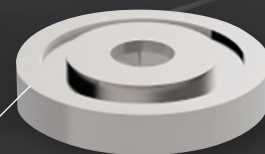

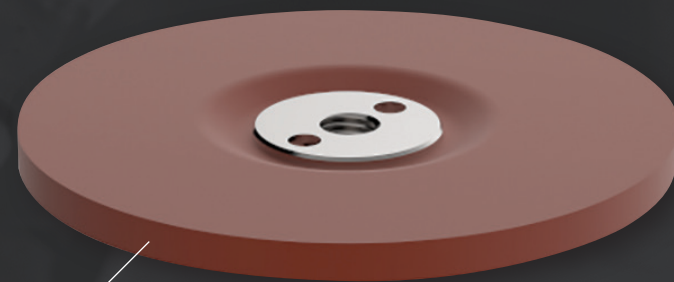

Replace grinding wheels
Easily!

4" GRINDER

EZ Grind

EZ Washer

EZ SpinLock

PRODUCTS

Existing

After improvement

No longer need to carry L-wrenches and spanners.

When detaching grinding wheels, use the EZ SpinLock-attached grinder instead of a spanner to easily fix the grinder spindle shaft. And spin the wheel counter-clockwisely by your hand. When attaching grinding wheels, you don't need to tighten it by force, just fasten it lightly. It will be tightened automatically, so you can use it safely.

You can replace even large
and heavy grinding wheels

Lightly!

7" GRINDER

EZ Grind

EZ Washer

EZ SpinLock

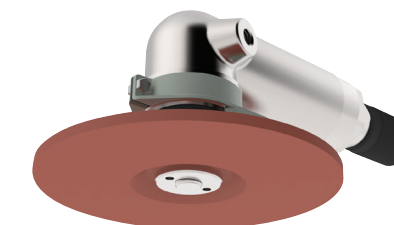

PRODUCTS

Existing

After improvement

**Worrying that grinding wheels won't
come loose because a 7" grinder rotates
much more strongly than a 4" grinder?**

EZ washer, developed with Makeit Co., Ltd.'s
technology, enables anyone of any age or gender
to easily detach the wheel from a 7" grinder with
very little force.

It requires less force than when using a spanner
and L-wrench, reducing the risk of injury to the
musculoskeletal system of the operator.

Replacing grinding wheels for
the compact tool

more Compactly!

BABY GRINDER

EZ Grind

EZ SpinLock

PRODUCTS

Existing

After improvement

The baby grinder is applied the same mechanism as the 4" and 7" grinders,

When detaching the tip, operate the EZ SpinLock to fix the grinder spindle shaft. And hold the stone and spin it counter-clockwisely by your hand. There is no need to put the grinder down on the floor, so it improves working efficiency greatly on working at high altitudes.

We make it easier We make it safer We make it for you

We go a long way together.

**We consider
about your safety.**

We will improve the working environment so that customers in all industrial sites can work comfortably and safely.

**We protect the
environment.**

We will carry out eco-friendly and sustainable management for nature.

**We contribute to our
local community.**

We will contribute to the development of local industries by developing products suitable for the special shipbuilding zone with local partner companies. We will contribute to the creation of local employment by creating a workplace for both young and middle-aged people.

**We improve your
productivity.**

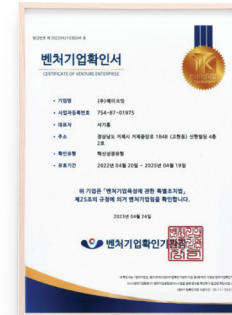

We will make your production faster, smoother and more efficient.

**We make a comfort
workplace.**

We will create a comfortable place where all executives and employees can work happily.
